

"I'm wearing Invisalign® right now – could you tell?"

Your treatment with Invisalign®

Invisalign® treatment starts with a visit to your doctor, who will examine you and develop a computer model of your treatment. Together with your doctor you can review and agree on your treatment before we make a series of aligners that will fit only you.

Each aligner is slightly different, moving your teeth gradually into the desired position.

Treatment length will vary depending on your case, but the average Invisalign® treatment is twelve to eighteen months.

Invisalign® Clinically Effective

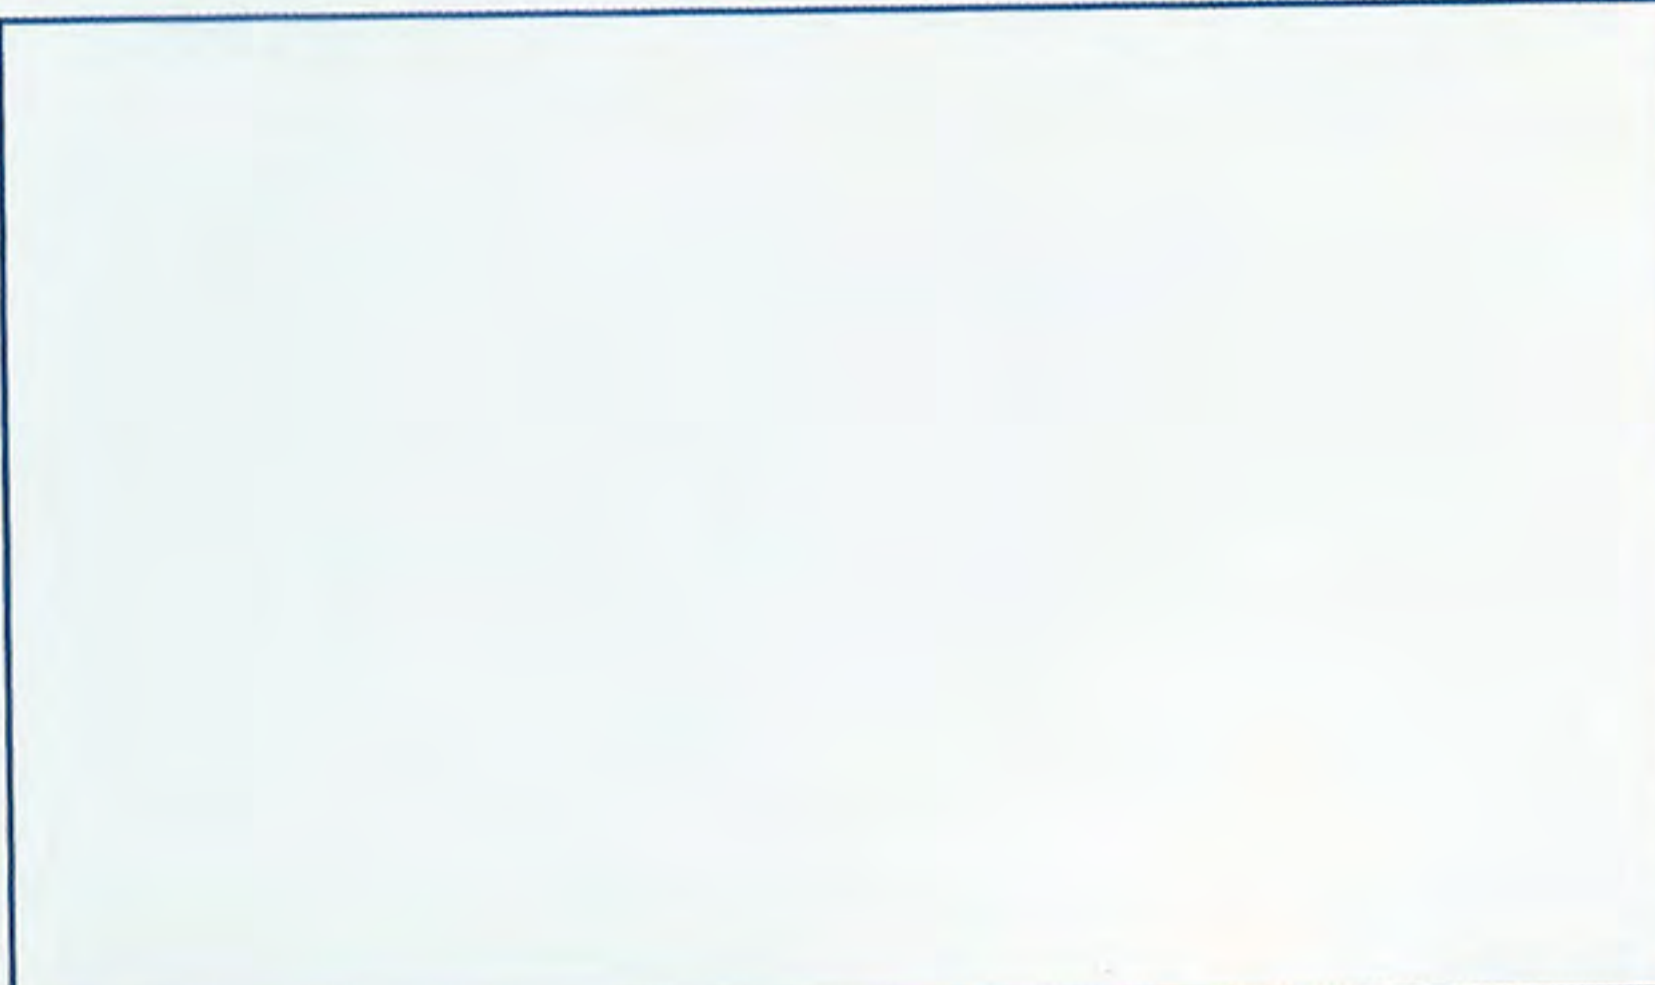

More than 10,000 doctors are prescribing Invisalign® as an innovative treatment for straightening teeth.

In addition to the aesthetic and comfort advantages, Invisalign® offers a number of significant clinical benefits including:

- Predictable treatment, as Invisalign® is planned in advance your doctor can more accurately predict when your treatment will be finished
- Improved periodontal health through better dental hygiene during treatment²
- No metal allergies due to brackets and wires
- Greater treatment visibility and easier planning with our treatment software
- Custom manufacture means a tailored match to your teeth, for reduced irritation and fewer scratches

Only your doctor can advise whether Invisalign® is the best treatment for you. Arrange a consultation today!

Invisalign® – show off your smile, not your braces

Nothing is as important as a genuine and heartfelt smile. Whether in your professional life or when you are out socialising, an attractive smile can make you feel happier and more relaxed – as well as making the right impression!

If you've ever thought about how improving your smile could help you to feel more confident, Invisalign® might be for you.

With the Invisalign® technique you can have the smile you always wanted, without traditional, metal braces.

"As a professional, people notice my smile."

Invisalign® – the clear choice

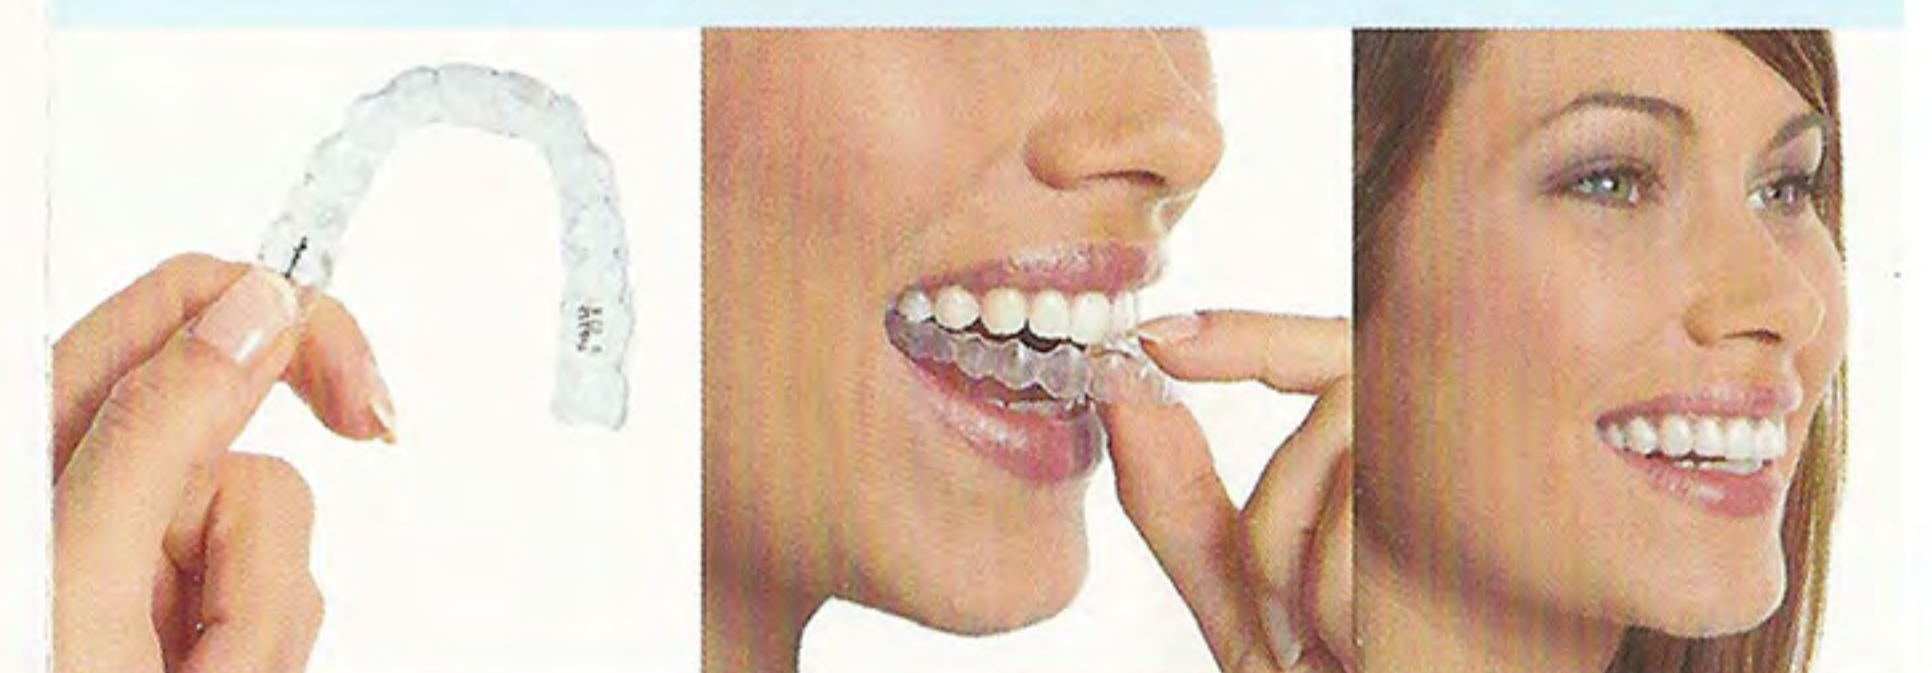

Invisalign® can help to treat a variety of orthodontic concerns and studies have shown it can be better for your dental hygiene² during treatment as well.

Your treatment is nearly invisible, almost no-one will be able to tell you are wearing Invisalign®. You can smile more during as well as after your treatment and because you can remove Invisalign® you can eat and drink what you like.

So far over 480,000 patients worldwide have more reasons to smile – thanks to Invisalign®.

Clear, removable, comfortable
