

How it Works

Our inspiration for the orthocaps system comes from nature itself. Invisible orthocaps aligners derive their efficacy from natural principles.

Everyone's teeth are different, which means no two cases of dental misalignment are exactly the same. That's why your orthocaps aligners are created specifically for you, based on your orthodontist's precise diagnosis of your teeth.

Our international specialists custom-manufacture your transparent orthocaps aligners prior to treatment.

They work closely with your orthodontist. Your aligners are specially designed for the correction you need.

Transparent orthocaps aligners have no metal parts, guaranteeing you unrivaled comfort throughout treatment. Invisible orthocaps alignment is the surest way to a beautiful set of teeth. Just smile – orthocaps will take care of the rest!

The TwinAligner® System

Invisible orthodontic correction with orthocaps is especially comfortable thanks to the unprecedented use of two distinct aligner types made from different materials.

The orthocaps system comprises two sets of transparent aligners. Each set is made from a separate material and exerts a different amount of pressure. This innovation is called TwinAligner®.

During the day, hardCAPS aligners work imperceptibly while you go about your personal and professional life.

At night, whether you are asleep or simply less active, softCAPS aligners take over for continuous orthodontic correction.

Using orthocaps becomes an effortless and inconspicuous part of your daily routine.

The Many Advantages of orthocaps

Until now, it has been rare for adults to seek orthodontic treatment. Traditional fixed metal braces are unsightly and must be worn non-stop for an extended period of time. This makes them too uncomfortable and inconvenient for many people. orthocaps is different. Why? Our aligners are transparent and removable. See for yourself!

Information for Patients

Light up the room with a natural smile. You can finally feel free again – to show your smile and take a big bite out of life! Let orthocaps give you a fresh start.

Interested in using orthocaps? Ask your orthodontist for more information about innovative orthocaps aligners!
